

VACCINE FACTS

THE COVID-19 VACCINE

DOES NOT HARM FERTILITY OR PREGNANCIES

Fact

VACCINES DO NOT AFFECT FERTILITY

There is no scientific evidence that the COVID-19 vaccines affect male or female fertility.

VACCINES ARE PREGNANCY SAFE

Miscarriage rates do not increase after receiving the COVID-19 vaccine.

Fact

Fact

THE COVID-19 VIRUS MAY IMPACT FERTILITY

Any infection that involves fever, like the infection caused by the COVID-19 virus, can cause decreased sperm count, testicular inflammation, sperm duct inflammation, and testicular pain in men, as well as ovulation issues in females.

Myth

VACCINE HARMS FERTILITY AND PREGNANCIES

Protect your fertility or your unborn baby by getting vaccinated against the COVID-19 virus!
